

## How to rake a bunker

After hitting a shot from a bunker, you are obligated to leave the sandy hazard in good shape. That means raking the area you hit, where you stood, where you walked, and even cleaning up the mess made by someone else. Rake the sand toward you as you walk backward to exit the bunker. When you are done, leave the rake just outside of the bunker, unless the rake has a message on it that says to leave it inside.
