

Golf Maintenance and Fund Tournament continue Bermuda Program

Thanks to the Fund Tournament for purchasing sand, seed, and herbicide for our bermuda program. We will be trying a different strand of bermuda seed this year, with hopes of quicker germination. The bermuda seed/sand divot filling program will run from May to September. We will also be experimenting with the use of a herbicide that removes cool season grass from warm season grass. The idea is to remove the cool season competition when the temperature gets warm enough for warm season turf to flourish.
