

APPENDIX 2. NOTIFICATION TEMPLATE

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Este informe contiene información muy importante sobre su agua potable.
Por favor hable con alguien que lo pueda traducir.

**Nitrate Monitoring Requirements
Not Met for Rancho Maria Golf Course During 2018**

Our water system failed to monitor as required for drinking water standards during 2018 and, therefore was in violation of the regulations. Although this is not an emergency, as our customers, you have a right to know what happened, what you should do, and what we did to correct the situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During calendar year 2018, we did not collect nitrate samples from Well 2 and therefore, cannot be sure of the quality of our drinking water during that time.

What should I do?

- There is nothing you need to do at this time.
- The table below lists the contaminant we did not properly test for during the calendar year 2018, how many samples we are required to take and how often, how many samples we took, when samples should have been taken, and the date on which follow-up samples **were OR will be** taken.

Contaminant	Required sampling frequency	Number of samples taken	When all samples should have been taken	When samples were OR will be taken
Nitrate	Minimum is one sample annually from Well 2	None	During calendar year 2018	3.12.19

- If you have health issues concerning the consumption of this water, you may wish to consult your doctor.

What happened? What is being done? We failed to test for nitrates but nitrates were fine according to USGS.

[Describe corrective action] nitrates have been tested and were fine. It just wasn't California Cert.ified ELAP

We anticipate resolving the problem within [estimated time frame] It has been resolved - nitrates were tested by
