I have competed and won on many levels. My vast tournament experience and lifelong devotion to the game through working with great teachers and personal practice experimentation will help my students with their games.

My teaching philosophy is to stress **posture, grip, and alignment**. We will then begin to learn the correct path of the club and the desired position of the clubface in order to hit straight solid golf shots. The correct body movements and a well balanced finish will be prescribed as needed along the way. Every lesson begins with the ball flight laws, what does the ball do and why! Above all, PRACTICE will advance the student to the desired level of performance.
